

BULLETIN - PLEASE READ!

TECHNICAL BULLETIN

This adjustable chaffer or sieve is manufactured using original equipment dimensions, and will be installed using the same instructions found in your operator's manual.

Be sure to check the condition of your shoe before installing the new chaffer or sieve. Damage will occur if the bushings or hardware are worn, as this causes excessive vibration which can bend and break the chaffer frame. If this occurs, warranty may be void.

Loewen Manufacturing has designed this product to be repairable, longer lasting, and easier to adjust than original equipment.

If you require repair parts in the future, please see the list below to determine the correct ordering numbers:

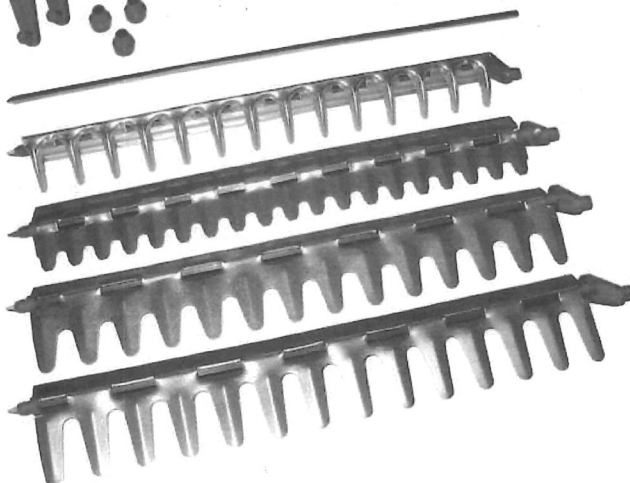

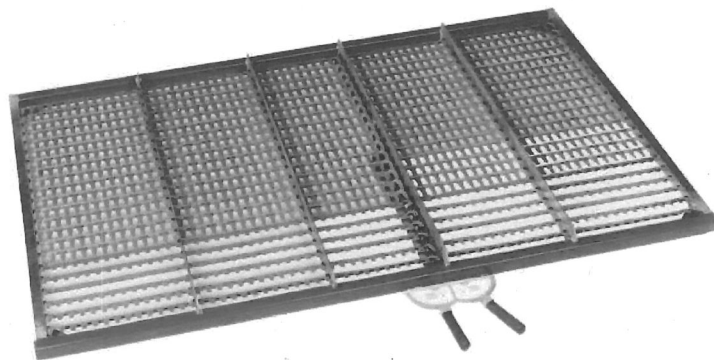

Adjustment Arm Clip, A-CLP7
Nylon Adjustment Arm, A-ALV6
Nylon Bushing, A-CLV5
Chaffer Wire, A-WLV4

Adjustable Air Foil Louver, A-PLV12

Blunt Finger Louver, A-BFLV12

Short Finger Louver, A-SFLV12

Long Finger Louver, A-LFLV12
