

HAY CARTAGE TRAILER FRAME

The Collier & Miller Hay Cartage Trailer Frame converts your drop deck semi into a high-capacity hay transporter, carrying up to 42 large rectangular bales within NHVR regulations.

The fully hydraulic system, powered by the towing vehicle, allows the frame to adjust in width and height for easy loading and secure compression of the bale stack. Dual centrally mounted air ratchet tie-down systems lock the top frame in place during transport, maintaining load stability under tough road conditions.

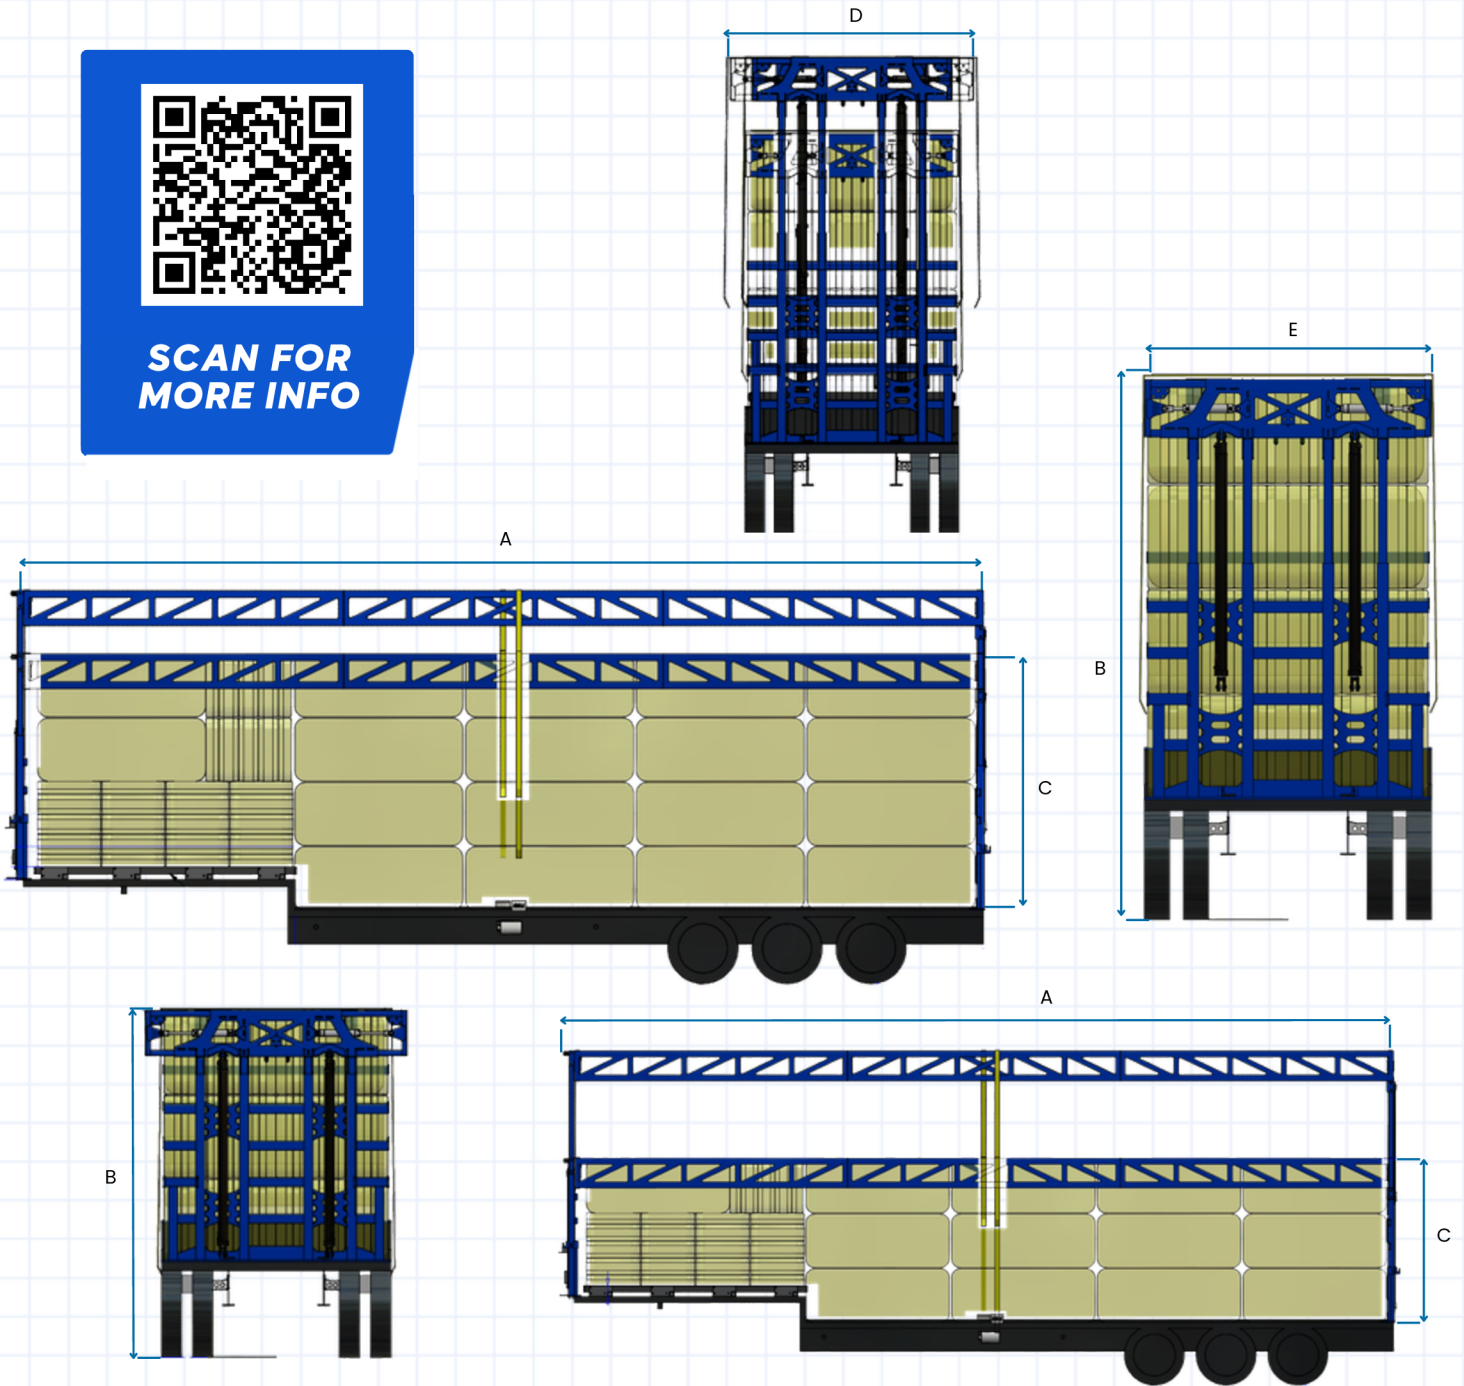

FEATURES & BENEFITS

- Australian Patent Application No. 2024903145
- Carries up to 42 large rectangular hay bales
- Fits drop deck trailers up to 13.7 m
- Hydraulic width and height adjustment
- Powered by towing vehicle's hydraulic supply
- Dual air ratchet tie-down systems for secure transport
- Complies with NHVR mass, dimension, and loading regulations
- No trailer modification required for installation
- Available in multi-combination configurations, including Road Train and B-double arrangements
