

TRASH RACK

Keep your irrigation channels clear and ensure your pumps run at peak efficiency with Collier & Miller's game-changing Trash Rack.

Designed to ensure the smooth flow of irrigation water, the C&M Trash Rack effectively filters debris, including flyaway grass, roly poly, cotton trash and wheat stubble, preventing troublesome pump station blockages.

This robust system features a front grate and a rotating rack that lifts out of the water when not in use.

FEATURES & BENEFITS

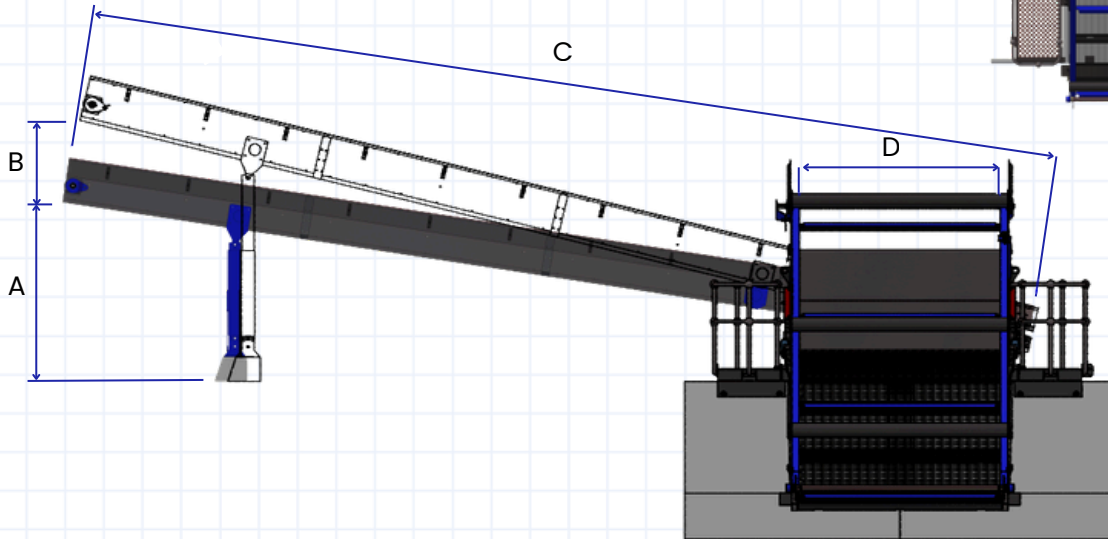

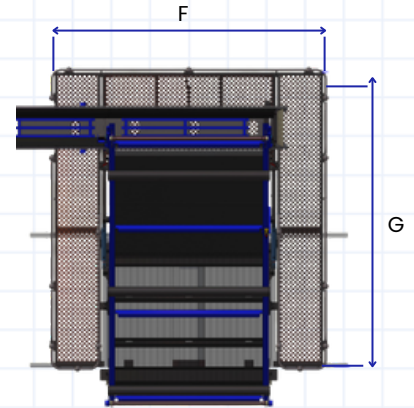

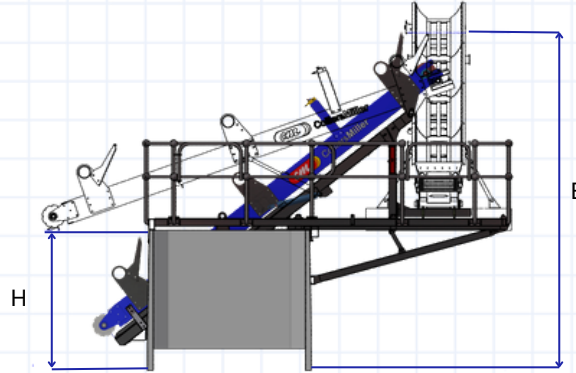

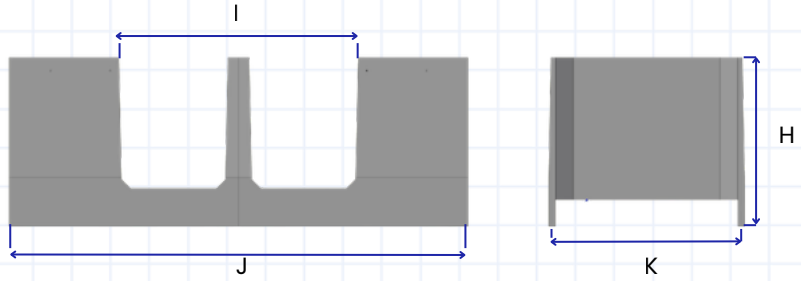

- Filters debris, including flyaway grass, roly poly, cotton trash and wheat stubble
- Heavy-duty grate and rotating rack system
- Discharge conveyor
- Hydraulic power pack
- Robust engineering and heavy-duty design
- Custom design and additions available
