RE: Fusion AGM Batteries™ (CBC Series) & SSB DryCell™ AGM Batteries
– Fire Safety and Flammability

16th November 2022

To Sam,

This letter is to confirm that all Fusion Cyclic AGM Batteries™ and all SSB DryCell (HVT)™ AGM Batteries are made with a UL94 V-0 certified Fire-Retardant ABS plastic case and satisfies the requirements as set by FPA Australia. In addition, they are manufactured to comply with Australian Standard AS4029.2.

In Addition, all CBC Series Fusion AGM Batteries™ and SSB DryCell™ AGM Batteries are manufactured in accordance with ISO and CE standards and have been certified for VdS Approval.

These batteries do not require maintenance of the electrolyte fluid and are sealed, non-spillable batteries. In circumstance where the case is ruptured or cracked, no electrolyte will leak from the battery. In addition, a one-way safety pressure valve ensures optimal internal pressure is maintained within the battery and any possibility of combustion or explosion is prevented.

If you have further questions, please do not hesitate to contact the undersigned on (02) 9755 7851.

Yours faithfully,

Lance Trigas
