Release Date	25-07-20225
Bulletin Type	New Product
Topic	193414C2

Overview

C&M have manufactured a replacement for Case-IH 193414C1 front auger bearing block. The OE bearing is manufactured from oil impregnated timber. The new C&M version is manufactured from oil impregnated yellow cast nylon polymer.

Advantages.

- Extended life
- No rotting of bearing during equipment storage
- Oil impregnated for smooth reduced friction operation
- Cast nylon polymer that will not rot or degrade over time
- Made in Australia
- Material is malleable enough to accept cup-head bolt square and deform
- Supplied with mounting hardware (Bolts, nuts & washers)
