Milwaukee® Step Drill Bits with JAM-FREE Performance feature a dual-flute design delivering faster starts, more life and holes per charge across the cordless platform. Ideal for drilling small and large-diameter holes in steel and plastic, these bits are optimised for Cordless Drills in High Speed. The Rapid Strike™ tip allows for a fast and accurate start that generates less heat, resulting in longer bit tip life. Black oxide coating also enhances durability, hole quality and bit life. For user convenience and accuracy, each bit has laser-engraved reference marks you can see while drilling. The 3-flat Secure-Grip™ shank ensures a solid connection with the drill chuck. The new Milwaukee® Step Bits will offer a complete range of sizes (4mm to 65mm) with 4 different Step Bits and a 3 piece kit. Each bit demonstrates Milwaukee's continued commitment to deliver innovative solutions to save time and increase productivity on the jobsite.
