9556HNRK

100mm (4") Angle Grinder

240v

100mm (4") Angle Grinder

The 100mm (4") Angle Grinder features a powerful 840W motor that delivers 11,000 RPM for high output. This model replaces the 9556NBK and comes with enhancements like an anti-restart function and soft start technology for improved safety.

The labyrinth construction protects the drive gear and bearings, and the dust-proof ball bearing on the spindle adds durability.

Designed for user convenience, it includes a slide switch with a lock-on feature, a push-button spindle lock, and a repositionable side grip. The gear housing is rotatable for versatile cutting and grinding tasks, and it can be paired with dust extraction systems using an optional dust-collecting wheel guard.

Product Overview

240v

Product Specification Sheet

240V

Wheel diameter	100mm (4")
Hole diameter	16mm
Spindle thread	M10 x 1.5
No load speed	11,000rpm
Continuous rating input	840W
Overall length	271mm
Net weight	1.6kg

- **Powerful 840W Motor** – powerful motor ensuring steady and efficient cutting, even for masonry applications
- **Rotatable Gear Housing** – the gear housing can be positioned in 4 various angles to suit various grinding applications.
- **Anti Restart Function** – prevents accidental motor restarts for maximum safety, ensuring the tool cannot start if it is connected to a power source while the start switch is in the ON position.
- **Barrel Grip Handle** – the new Type 55 motor features a reduced circumference, providing enhanced comfort for extended use.
- **Heat-Resistant Motor** – the upgraded motor offers increased heat resistance, allowing it to stay cooler for longer than the previous model, which enhances durability and extends the tool's lifespan.
- **Slide Switch** – conveniently positioned in an ergonomic location for easy one-handed operation and improved comfort.
- **Soft Start** – gradually increases wheel speed when the switch is pressed, reducing initial shock and allowing for better control of the tool, which enhances safety and creates a smoother user experience.

Performance

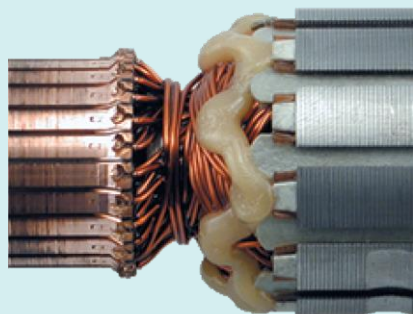

Powerful 840 Watt AC motor allows for continuous operation.

Safety

The 9556HNRK includes a soft start and anti-restart features for enhanced safety

Durability

Engineered for increased durability with heat resistive motor for longer tool life.

Comfort

Slim tool body and side switch designed for enhanced comfort and functionality

Anti-restart / Soft Start

Anti-Restart:

This feature enhances safety by **preventing accidental start-up** of the tool, even when plugged in with the switch in the "on" position. This **minimizes the risk of injury** and promotes a safer working environment, especially in busy settings.

Soft Start:

The soft start function **gradually increases the wheel speed** when the switch is pressed, allowing for a controlled and gentle start. This reduces initial shock and provides a smoother user experience.

After the slow start, the tool quickly reaches maximum speed, ensuring **efficient operation while minimizing wear** on the tool and enhancing user comfort.
