18V Brushless Compact Recipro Saw

LXT

DJR189

Product Statement

18V Brushless Compact Recipro Saw

The 18V brushless reciprocating saw (DJR189) has a lightweight and compact design to enhance workability in tight places. The DJR189 features a loop shaped handle to enhance housing rigidity, improve cutting efficiency, and minimise the chance of injury. The handle can be gripped one-handed and is positioned to allow firm transmission of force to the workpiece where it may be difficult to exert force on the blade such as in tight places.

The DJR189 is also fitted with a unique counterweight mechanism to reduce tool vibration meaning users experience lower fatigue. The DJR189 also comes standard with several other features, including electric brake for safety, LED job light to enhance visibility, eXtreme Protection Technology (XPT) for increased dust and water resistance, and a fixed type pivoting shoe plate. The DJR189 is the perfect solution where jobs require a lightweight and compact reciprocating saw.

Product Overview

Lightweight &
Compact Design

LED Job Light

Electric Brake

Fixed Type Pivoting Shoe
Plate

Counterweight
Mechanism

Loop Shaped
Handle

Product Specifications

Max. cutting capacities in wood	255mm
Max. cutting capacities in pipe	ø 130mm
Length of stroke	22mm
Strokes per minute	0-3,100spm
Overall length	366mm
Skin weight	1.9kg
Weight (with battery)	2.5kg (BL1860B)
Voltage	18V

- **Lightweight & Compact Design** – The lightweight and compact design means to tool can be used for prolonged periods of time in tight places.
- **LED Job Light** – Positioned at the front of the tool allowing for optimal illumination during operation.
- **Electric Brake** – Maximises productivity and user safety by rapidly slowing the blade speed after the switch has been released.
- **Fixed Type Pivoting Shoe Plate** – The front shoe can pivot in a fixed position offering the user flexibility and support while cutting.
- **Counterweight Mechanism** – Equipped with a counterweight mechanism which drastically reduces vibration under loaded conditions for a more comfortable operation.
- **Loop Shaped Handle** – The tools comes fitted with a loop shaped handle that can be gripped one-handed to improve cutting efficiency and minimise the chance of injury.

Advantages

Compact

Lightweight and compact design for efficient use in tight spaces.

Innovation

AVT - Counterweight mechanism which drastically reduces vibration

Efficiency

Looped shaped handle increases efficiency, safety, and can be gripped one-handed.

Convenience

Electric brake, LED Joblight, and eXtreme Protection Technology,

Product Replacement

	NEW - DJR189	PREVIOUS - DJR188
		
Length of stroke	22mm	20mm
Strokes per minute	0-3,100spm	0-3,000spm
Overall length	366mm	316mm
Skin weight	1.9kg	2.3kg
Weight (with battery)	2.5kg (BL1860B)	2.9kg (BL1860B)
Voltage	18V	18V

Accessories

Standard Accessories		
	B-05038	1 piece x 152mm Metal Blade
	B-05044	1 piece x 152mm Multi Material Blade
	B-05153	1 piece x 203mm Wood Blade
NOTE: Above blade part numbers are provided as packs of 5 / only 1 of each blade is provided as standard with recipro saw		

Optional Accessories		
	-	Wood Blades Available in sizes from 100mm to 300mm
	-	Metal Blades Available in sizes from 100mm to 300mm
	-	Multi Material Blades Available in sizes from 100mm to 305mm
	-	Demolition Blades Available in sizes from 155mm to 305mm
	-	Specialized Blades Stainless Steel / Fibreglass Hebel / Fibre Cement Rubber / Foam Fibreglass / Cast iron Frozen material / Butchery
