Cooling air flow direction diagram

Industrial design patent

201930523837.8, 201930523846.7, 201930524093.1, 201930523810.9, 202030714217.5, 202030146986.X

The patented wide - mouth crank case has a larger cavity than a traditional pump. This allows the room for bigger diameter fans to be used . Resulting with larger air flow and stronger air volume. The larger air volume acts directly on heating elements such as the motor, cylinders, pistons and valves, enhancing the cooling process.

OIL FREE TECHNOLOGY

SPECIFICATIONS

- Motor: 900 Watts
- Motor speed: 2800rpm
- Voltage: 240v-50hz
- Tank size: 3 Litres
- Air displacement: 170 litres
- FAD: 87 litres per minute
- Maximum pressure 115 P.S.I.
- Weight: 11 KG. **Model: FT9003**
