

# 125mm (5") Angle Grinder

**240v**

GA5030R

## 125mm (5") Angle Grinder

The 125mm (5") 720W Angle Grinder is a versatile and durable tool built for high-performance applications. Its 720W motor delivers 11,000 rpm, making it ideal for tough grinding and cutting tasks.

Safety is a priority with the anti-restart function, which prevents accidental start-up, and the soft start feature, ensuring smooth and controlled operation. Designed for user comfort, the grinder has a compact barrel grip and an ergonomic design to reduce fatigue during extended use. Its labyrinth construction and zig-zag varnish coating protect the motor and bearings from dust and debris, extending tool life.

With double insulation for increased durability and a well-balanced design for improved handling, this angle grinder is a reliable choice for everyday uses.

# Product Overview

**240v**

# Product Specification Sheet

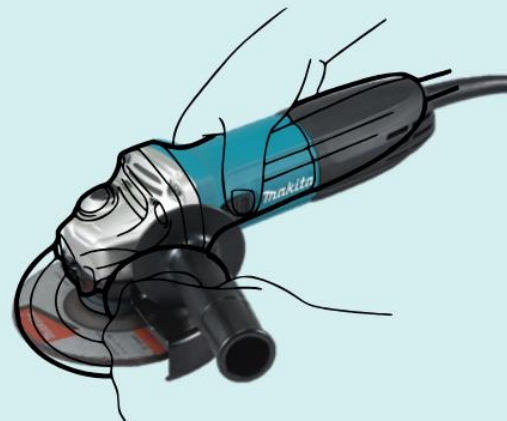

Wheel diameter	125mm (5")
Hole diameter	22.23mm
Spindle thread	M14 x 2
No load speed	11,000rpm
Continuous rating input	720W
Overall length	266mm
Net weight	1.8kg
Power supply cord	2.0m

- **Ergonomically best possible barrel grip** – achieved by the design of motor housing, it allows for any user's palm & fingers to wrap perfectly around for comfortable handling.
- **Durable shaft lock**– firmly supported by metal sleeve built in gear housing prevents cracks in gear housing and drop of pin cap
- **Soft start** – minimises startup shock and make tool start smoothly
- **Lightweight design** – at only 1.8kg allows for comfortable operation in prolonged application
- **High durability design** – high quality motor with excellent heat resistance, machine bevel gears and dual protection against dust all feature for enhancing the long term durability of the grinder.
- **Anti-restart function** – Prevents accidental start-up even if the tool is plugged to power source with the switch "ON".

## PERFORMANCE

Powerful 720W motor with excellent heat resistance

## ERGONOMIC

Lightweight with ergonomic grip for easy handling

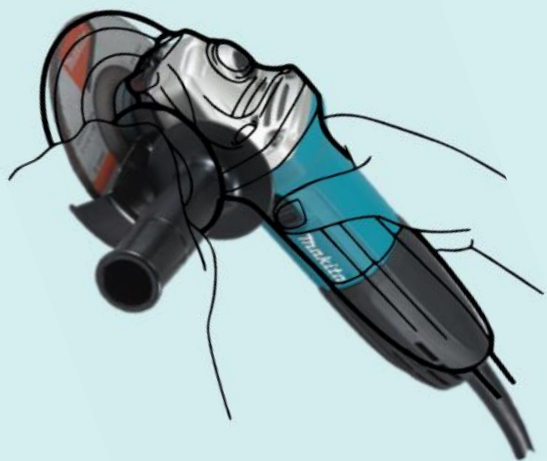

## DURABILITY

Anti-restart protection in the event of power disruption

## ERGONOMICS

### Best possible barrel grip for angle grinder

Regardless of whether the user grips motor housing or rear cover, the extra-ergonomic barrel grip fits any user's palm and fingers perfectly as illustrated below, and provides easy and comfortable handling while minimizing hand fatigue and pain

- ✓ Superior control for precise operation
- ✓ Minimises hand fatigue and strain during extended use
- ✓ Improves safe handling, reducing the risk of slips or misalignments
