

## NEW PRODUCT RELEASE HEAVY DUTY HIGH POWER WORKLIGHTS

### Features:

- Ultra powerful 6000lm 60W Worklight
- Heavy duty design
- Removable handle and adjustable bracket
- Integrated weather proof off / on switch
- DT connection as standard
- CISPR 25 certification

### Description:

Whitevision's LWL500 and LWL600 series work lights set a new standard for heavy duty auxiliary lighting. Packed with a powerhouse of high performing features, these heavy duty, industrial grade lights have an incredible light output of 6000lm with 60W output power. By using a specialised heatsink with advanced cooling technology, ensures that operating these work lights is smooth and consistent. With a built-in high quality on/off switch, allowing for easy control these lights can be connected securely via a reliable DT connector.

The easy to remove handle and adjustable stainless steel mounting, means these lights will not only out perform any older styles, they are also built to last. Virtually bullet proof polycarbonate lenses, environmentally rated to IP67 and conforming with CISPR25 Class 3, these lights are built and ready for even the most demanding applications.
