

WHITEVISION®

LIGHTING HARNESS SOLUTIONS

EZY PATCH™

Description:

Our new Whitevision EZY Patch System, streamlines the process of connecting rear LED Signal Lighting to specified vehicles. The Ezy Patch looms are carefully and strategically designed for plug and play connectivity - allowing you to easily connect to the vehicles wiring harness, saving both time and money. OEM and DT style connectors are used to ensure a secure and reliable lasting connection.

The EZY Patch system comes with inbuilt loading options to ensure compatibility with the vehicles fault detection systems. Whitevision's range of EZY Patch compatible lighting is designed to seamlessly integrate with all Ezy Patch looms, helping you to provide a high quality, fast fit rear lighting solution for OEM and aftermarket applications.

Features:

- Fast Fitting, Time Saving
- OEM Plug and Play
- Accurate Connection Every Time
- Complete Range Covers Most Vehicles
- Loading options Available
- Compatible with Whitevision Ezy Patch Lighting Range
