Application

Ideal for use on gates, doors, letterboxes, trim, fixtures, furniture, toys, craft projects, car components, home DIY Projects and various industrial application. Can be used with confidence on metal, wood or fibreglass.

Specification

Propellant DME

Directions

Invert can and shake vigorously for 2 minutes after the mixing ball starts to rattle. Shake frequently during use. Hold upright and spray from a distance of approximately 15-30cm. For best results, apply 2 light even coats at 15-20 minute intervals rather than 1 heavy coat. Additional coats can be applied after 15-20 minutes. Touch dry in 15 minutes at 20°C. Fully cured in 24 hours at 20°C

Clean up

Clear nozzle after use, invert can and spray for 3 seconds or until only propellant is expelled. Overspray can be cleaned with Mineral Turpentine or All Purpose Thinners.

Surface Preparation

For best results, apply to a clean, degreased, dry surface. Remove any residual rust and scale with a wire brush or other abrasive method. Clean the area to be treated with a non-residue solvent cleaner such as Boston Wax & Grease Remover. Prime the surface with a suitable Boston Primer.
