When a narrowband radio receives a transmission from an older wideband radio the speech may sound loud and distorted – simply adjust your radio volume for the best listening performance. When an older wideband radio receives a signal from a new narrowband radio the speech may sound quieter - simply adjust your radio volume for best listening performance. When operating a narrowband radio or Channel 41 - 80 interference is possible from wideband radios transmitting on high power or on adjacent frequency.

The issues described above **are not a fault of the radio** but a consequence of mixed use of wideband and narrowband radios.

R-NZ

This unit complies with all relevant Australian and New Zealand approval requirements AS/NZS 4365:2011 including radio communications (Electromagnetic Radiation Human Exposure) standard 2003.

Safety Information and Warnings

⚠️
WARNING

Information on Safe Operation

Read This Information Before Using Your Oricom Radio.

The operation of your UHF radio in Australia and New Zealand is subject to conditions in the following licenses:

In Australia, the ACMA Radio communications (Citizen Band Radio Stations) and in New Zealand by MED the General User Radio License for Citizen Band Radio.

Radio Antenna

Do not use any radio that has a damaged antenna. If a damaged antenna comes in contact with the skin, a minor burn may result.

Unauthorized antennas, modifications, or attachments could damage the radio and violate compliance. Do NOT change or modify the antenna.

Do NOT hold the antenna when the radio is "IN USE." Holding the antenna reduces range and may cause bodily harm.

Safety and general use whilst in a vehicle

Check the State and Federal laws and regulations regarding the use of two way radios in the area where you drive, and always obey them.

⚠️
WARNING

For Vehicles fitted with Air Bags

Do not place your radio in the area over an air bag or in the air bag deployment area. Air bags inflate with great force. If a radio is placed in the air bag deployment area and the air bag inflates, the radio may be propelled with great force and cause serious injury to the occupants of the vehicle.

Read all these Safety Warnings before you install batteries.

- Do not dispose of the batteries in a fire as they may explode.
- Exercise extreme care when handling batteries in order not to short the battery with conducting materials such as rings, bracelets and keys. The battery or conduction material may overheat explode and or cause burns.
- Never replace batteries in a potentially explosive atmosphere (such as where gas is leaking) as contact sparking may occur while installing or removing the batteries and cause a fire or an explosion.
- Do not modify, cut, disassemble, crush, bend, puncture, heat or damage the batteries.

⚠️
WARNING

- If batteries leak, do not let the battery liquid touch skin or eyes. If this happens, immediately flush the affected areas with water, and seek medical assistance. Released electrolyte is corrosive and may cause damage to the eyes and skin. It may be toxic if swallowed.
- Do not immerse or expose the batteries to water or other liquids.
- Never use damaged batteries as they may explode.
- Remove batteries when they are no longer able to hold a charge and when the equipment will not be used for an extended period of time.
- Dispose of batteries according to local regulations, never in your household rubbish.

WARNING:

Risk of explosion if battery is replaced by an incorrect type.

Potentially Explosive Atmospheres

Turn your radio OFF when in any area with a potentially explosive atmosphere. Sparks in such areas could cause an explosion or fire resulting in injury or even death.

⚠️ WARNING

NOTE: Areas with potentially explosive atmospheres are often, but not always clearly marked. They include fueling areas such as below deck on boats; fuel or chemical transfer or storage facilities; areas where the air contains chemicals or particles, such as grain, dust, or metal powders; and any other area where you would normally be advised to turn off your vehicle engine.

Blasting Caps and Areas

To avoid possible interference with blasting operations, turn your radio OFF near electrical blasting caps or in a "blasting area" or in areas posted: "Turn off the two way radio." Obey all signs and instructions.

Exposure to Radio Frequency Energy

Your Oricom two-way radio complies with Australian Communications Authority Radio communications (Electromagnetic Radiation-Human Exposure) Standard, 2003.

To assure optimal radio performance and make sure human exposure to radio frequency electromagnetic energy is within the guidelines set out in the above standards always adhere to the following procedures.

⚠ WARNING

Transmit and Receive Procedure

Your two-way radio contains a transmitter and a receiver. To control your exposure and ensure compliance with the general population/uncontrolled environment exposure limits, always adhere to the following procedure:

• Transmit no more than 50% of the time.
• To receive calls, release the PTT button.
• To transmit (talk), press the Push to Talk (PTT) button.

Transmitting 50% of the time, or less, is important because the radio generates measurable RF energy exposure only when transmitting (in terms of measuring standards compliance).

Always hold the radio approximately 5cm in front of your mouth with the antenna pointing away from your head.

Radio Operation and EME Exposure

Unauthorized antennas, modifications, or attachments could damage the radio and violate compliance.

Do NOT hold the antenna when the radio is "IN USE." Holding the antenna reduces the effective range.

Do not use the radio if the antenna is damaged. If a damaged antenna makes contact with your skin, a minor burn can result.

⚠️
WARNING

If you wear a radio on your body when transmitting, always fit the radio on the belt clip (supplied). Always ensure the radio and it's antenna are at least 5cm from your body when transmitting.

Electromagnetic Interference/ Compatibility

Nearly every electronic device is susceptible to electromagnetic interference (EMI). To avoid the possibility of electromagnetic interference and/or compatibility conflicts, turn off your radio in any location where posted notices instruct you to do so such as health care facilities.

Aircraft

When instructed to do so, turn off your radio when onboard an aircraft. Any use of a radio must be in accordance with applicable regulations per airline crew instructions.

Medical Devices - Pacemakers

The Advanced Medical Technology Association recommends that a minimum separation of 6 inches (15cm) be maintained between a handheld wireless radio and a pacemaker. These recommendations are consistent with the independent research by and recommendations of the U.S. Food and Drug Administration.

⚠️ WARNING

People with pacemakers should:

- ALWAYS keep the radio more than 15cm from their pacemaker when the radio is turned ON.
- Not carry the radio in the breast pocket.
- Use the ear opposite the pacemaker to minimize the potential for interference.
- Turn the radio OFF immediately if there is any reason to suspect that interference is taking place.

Medical Devices - Hearing Aids

Some radios may interfere with some hearing aids.

In the event of such interference, you may want to consult your hearing aid manufacturer to discuss alternatives.

Other Medical Devices

If you use any other personal medical device, consult the manufacturer of your device to determine if it is adequately shielded from RF energy. Your physician may be able to assist you in obtaining this information.

General warnings

Never use your radio outdoors during a thunderstorm.

Keep the radio out of reach of babies and young children.

Installing/Removing Belt Clip

Installing Belt Clip

Slide the Belt clip into the slot as shown in Figure 1. A "click" indicates the Belt Clip is locked into position.

Removing Belt Clip

Pull the belt clip latch back.
While pulling the belt clip latch, push up the belt clip as shown in Figure 2.

Figure 1   Figure 2

Installing Batteries

Lift the battery cover lock to open it. Then remove the battery cover.
Install the rechargeable batteries by following the orientation as shown in Figure 3.
Replace the Battery compartment cover and lock it correctly.

Figure 3

WARNING

- Follow the polar directions and insert 4 x AAA Ni-MH rechargeable batteries.
- Incorrect positioning can damage both the batteries and unit.
- Don't try to recharge non-rechargeable batteries.
- Make sure the battery compartment cover is securely locked in place when you are charging the batteries.
- Dispose of used batteries safely and in a way that will not harm the environment, never try to burn them or put them anywhere, they could get burnt or punctured.
- Don't leave dead batteries in you unit. They might leak if you do.

CHARGING BATTERIES

When the "Battery level ▭▭" icon is low, you need to charge the battery with the included AC/DC adaptor.

CHARGING WITH AC Adaptor

Charging directly with AC adaptor, please make sure the radio is off before charging.
Plug the adaptor into the wall socket and the other end into the radio earphone / charging jack.

The LCD ▥ Icon will flash.
Note: If you forget to turn off the
radio, the radio will automatically
turn off during charging. After
charging, you must turn it off
again and wait few seconds then
turn it on.
2 radios can be charged at the
same time.
Charge time for a full charge
requires about 8 ~ 10 hours.
After charging, unplug the adaptor
from the socket.

Figure 4

WARNING

- To avoid damage to the radio use only original
  accessories.
- The radio will be slightly warm during charging.

Transmitting Range

The talk range depends on the environment and
terrain. In general the radio can reach further in wide
open spaces, without obstructions such as hills or
buildings. Range is affected by concrete structures,
heavy foliage and by operating radios indoors or in
vehicles. Don't try to use two radio units which are
less than 1.5m (5 feet) apart. Otherwise, you may
experience interference.

13

Optimal Range
Outdoors
Flat, open areas

Medium Range
Outdoors
Buildings or trees
Also near residential
buildings

Minimal Range
Outdoors
Dense foliage or
mountains. Also inside
some buildings

Operation

POWER ON/OFF

To Power ON;
To power On the radio, press Power On/Off Key ⏻ for 2 seconds until a beep is heard and the LCD display turns on.

To Power OFF;
To power Off the radio, press Power On/Off key ⏻ for 2 seconds until LCD display turns off.

Adjust Volume Level (6 levels)

Press the Up key ▲ to increase the volume.
Press the Down key ▼ to decrease the volume.

Changing Channels

To select the main channel
Press the MENU key once, Main channel number displayed will flash.
Press ▲ or ▼ key to select your desired main channel number.
Press the PTT key to confirm and quit or press MENU to continue next function setting. LCD will display the channel frequency.
Press the PTT key to confirm and quit or press MENU to continue to the next function setting.
You have 10 seconds to decide before auto-reverting back to the main screen.

Key Lock

Press and hold o→ key for 3 seconds, LCD display
o→ icon.
All keys are locked except PTT and ♪ key.
To unlock, press and hold o→ key for 3 second again.

Scanning Channels

Press the SC/MON key once and LCD will display ↻
and radio will start scanning.
LCD display shows the scanning channel one by one.
It will stop at those channels with signal for a while.
*Note: Please aware that the scanning will stop at those
channels with the same CTCSS / DCS as your radio
setting only.*
Press ▲ or ▼ key to continue scanning.
Or if you want to use this channel, press PTT to
confirm and your radio will stay on this channel.
If there is no signal, it will continue to scan. Press
SCAN key or PTT to exit Scan function and return to
preset Channel.

Monitor

Press and hold SC/MON key to break the squelch
noise and open (un-squelch) the frequency for monitor
function. Release the SC/MON key to stop.

Transmitting and Receiving

The radio has 75 main frequencies and 38 CTCSS codes or 83 DCS codes. You can communicate with any other user who is using the same combinations, providing they are within range.

To transmit, press & hold the PTT key, LCD displays ⬆ TX icon indicating the radio is transmitting.

Hold the radio in a vertical position with the microphone 3-5 cm from your mouth and then speak. When you finish speaking, release the PTT key.

The radio will automatically sound the received signal from the other radio on the same channel, the LCD will display the receive icon ⬇.

The transmission is SIMPLEX "one way at-a-time." While you are speaking, you can not receive a transmission.

Adjust volume control if necessary.

RPT ON/OFF information

If a Repeater channel is selected, press MENU key once, then use ▲ or ▼ button to turn on or off. PLEASE NOTE: if the selected channel is not a repeater channel, this feature is not available and all other menu features will require 1 button push less to select that feature.

CTCSS/DCS Sub-code Function

This function can help you to select your group (38 CTCSS codes/or 83 DCS codes) of users on the same channel. Only the users with the same CTCSS/DCS code can listen and talk to each other. Please note that selecting a CTCSS/DCS code does not assure total privacy. In radio communication, any UHF CB radios can listen to all communications on the same channel when using the default standard setting with CTCSS/DCS = 0 (OFF).

CTCSS Code

Press Menu key MENU twice, the current CTCSS sub-channel number flashes on the LCD Screen.
Press the ▲ or ▼ button to select one of the 38 CTCSS sub-channels.
Press the PTT key to confirm and quit or press MENU to continue next function setting.

DCS Code

Each channel also has 83 digital codes to let you set up group of users for more private communication.
Press Menu key MENU 3 times, the DCS code will flash on the LCD Screen.
Press the ▲ or ▼ button to select the desired DCS code.
Press the PTT key to confirm and quit or press MENU to continue next function setting.

IMPORTANT

The unit will use the last codes either CTCSS or DCS being selected and confirmed.

Dual Watch

The unit has dual watch function. You can monitor two channels, the current and another (dual watch) channel. If the unit detects a signal on either channel, it will stop and receive the signal.

Press the MENU key 4 times, The **CH** icon will start flashing.

Press ▲ or ▼ key to select the dual watch channel (1-80, except the current channel), LCD will display OF if DW is turned OFF.

When DW is on, LCD will display **dw** icon.

Press the PTT key to confirm and quit or press MENU to continue next function setting.

VOX (Hands-Free Function)

The unit has a built-in Voice Activated Circuit (VOX) function. You can enjoy talking and listening without pressing PTT key.

The level of VOX sensitivity is shown by a number on the LCD Screen. At the highest level, the units will pick up softer noise (including background noise); and the lowest level, will pick up only loud noise.

Press the MENU key 5 times, LCD will display **vox** icon and VOX sensitivity digit will flash.

Press ▲ or ▼ key to select sensitivity level "OF, 1, 2, 3" for "OFF, Low, Medium and High respectively.
After turning on the VOX function, LCD will display **vox** icon.
Press the PTT key to confirm and quit or press MENU to continue next function setting.
Please speak close to the mic in order to activate VOX function.
Note: VOX operation is not recommended if the radio will be used in a noisy or windy environment.

Call Tone

You can use 1 of 10 different "Call Tones" to get attention of other user on the same channel.
Press the ♪ key, while your call tone is transmitted. The tone will sound, LCD will display the transmit ↘ and ♪ icons.

To select a call tone

Press the MENU key 6 times, LCD displays ♪ icon and call tone number will flash.
Press ▲ or ▼ key to select your desired call tone.
Press the PTT key to confirm and quit or press MENU to continue next function setting.

Key Tone

This feature allows the radio to emit a confirmation tone after pressing each button.
Press MENU key 7 times, LCD displays "t o".

Press ▲ or ▼ key to select the Key Tone On/Off. Press PTT to confirm and quit or press MENU to continue next function setting.

Roger Beep

The Roger Beep is a tone which is automatically transmitted whenever the PTT button is released. Press MENU key 8 times, LCD display "r o". Press ▲ or ▼ key to select the Roger beep On/Off. Press PTT to confirm and quit or press MENU to continue next function setting.

Reset the unit

Turn off the radio. Press and hold the PTT and Scan key. Turn on the radio.

Microphone/Earphone Jack

The unit is equipped with a microphone/Earphone jack located at the right side. You can use an optional earphone (not included) for handsfree function.

Duplex operation via Repeaters

This feature allows you to use local repeater stations that are designed to automatically re-transmit your broadcast over a large area thus giving you increased range.

Repeater stations are privately operated radio systems installed throughout Australia.

For example, if you wish to access a repeater station in your area which operates on channel 2, you need to set the Duplex access on this Channel.

When you have turned on the Duplex setting in the menu for the selected channel (and you are within range of a local repeater), your radio will automatically transmit to the repeater on channel 32.

Turning on/off Duplex on channels

a. Select the required channel to suit the repeater station you wish to access (Channels 1~8 and 41 ~ 48)

b. Press the MENU key once, "RPT" icon will display.

c. Press the Up or Down key to set the Repeater function to ON or OFF.

d. Press the PTT key to confirm your setting.

e. The RPT icon will display to indicate that Repeater function is set on that channel.

* The primary use for these channels is repeater operation using 750 kHz offset. Channels 1-8 and 41-48 inclusive are used for mobile reception and channels 31-38 and 71-78 for mobile transmission. In addition, any designated repeater channel may be used for simplex operation in areas where it is not used for repeater operation.

† Speech telephony shall be inhibited on these channels.

‡ At the time of production, Channels 61, 62 and 63 are guard channels and are not available for use.

Channel 5 and 35 (paired for Duplex repeaters) are reserved as emergency channels and should be used only in an emergency.

CTCSS and DCS will not operate on channels 5 and 35.

A list of currently authorised channels can be obtained from the ACMA website in Australia and the MED website in New Zealand. Channel 11 is a calling channel generally used to call others and channel 40 is the customary road vehicle channel.

Once contact is established on the calling channel, both stations should move to another unused "SIMPLEX" channel to allow others to use the calling channel.

Channels 22 and 23 are for Telemetry and Telecommand use, voice communications are not allowed on these channels by law.

Channel 9 and above are the best choices for general use in Simplex mode.

TROUBLE SHOOTING GUIDE

PROBLEM	GUIDE
No power or radio switches off after a short time	1: Check charger and batteries are installed correctly. 2: Clean battery contacts (Important!). 3: Replace batteries with fully charged or new batteries. 4: Battery capacity poor: battery defective or at end of life, replace batteries.
I cannot communicate with other group members	1: Verify, that the channel frequency and the CTCSS settings are the same on all radios. 2: The other group members are not within radio coverage.
Audio cutting in and out at receivers end.	1: Too weak signal-too far away. 2: External mic defective? Please contact Oricom Support.
Too many transmissions heard on my channel.	1: Another group is using the same channel number -change channel

Customer Support

If you have any problems setting up or using this product, you will find useful tips and information in the Troubleshooting section of this user guide as well as "Frequently Asked Questions" on our website www.oricom.com.au.

If you have further questions about using the product after reviewing the resources above or would like to purchase replacement parts or accessories, please call our Customer Support Team.

Important

Please retain your purchase receipt and attach to the back page of this user guide as you will need to produce this if warranty service is required.

Express Warranty (Australia)

This Express Warranty is provided by Oricom International Pty Ltd ABN 46 086 116 369, Unit 1, 4 Sovereign Place, South Windsor NSW 2756, herein after referred to as "Oricom".

Oricom warrants that the product is free from defects in materials or workmanship during the Express Warranty Period. This Express Warranty does not extend to any product from which the serial number has been removed or was purchased outside of Australia.

The benefits of this Express Warranty are in addition to other rights and remedies you may have under the Australian Consumer Law. Our goods come with guarantees that cannot be excluded under the Australian Consumer Law. You are entitled to a replacement or refund for a major failure and compensation for any other reasonably foreseeable loss or damage. You are also entitled to have the goods repaired or replaced if the goods fail to be of acceptable quality and the failure does not amount to a major failure. In the event of a minor failure, Oricom reserves the right to choose to repair or replace the product.

The Express Warranty Period will be a period of 3 years beginning on the date of purchase of the product evidenced

by your dated sales receipt. You are required to provide proof of purchase as a condition of receiving Express Warranty services.

You are entitled to a replacement product or repair of the product at our discretion according to the terms and conditions of this document if your product is found to be faulty within the Express Warranty Period. This Express Warranty extends to the original purchaser only and is not transferable.

Products distributed by Oricom are manufactured using new materials or new and used materials equivalent to new in performance and reliability. Spare parts may be new or equivalent to new. Spare parts are warranted to be free from defects in material or workmanship for thirty (30) days or for the remainder of the Express Warranty Period of the Oricom branded product in which they are installed, whichever is longer. During the Express Warranty Period, Oricom will where possible repair and if not replace the faulty product or part thereof. All component parts removed under this Express Warranty become the property of Oricom. In the unlikely event that your Oricom product has a recurring failure, Oricom may always, subject to the Competition and Consumer Act 2010, at its discretion, elect to provide you with a replacement product of its choosing that is at least equivalent to your product in performance.

No change to the conditions of this Express Warranty is valid unless it is made in writing and signed by an authorised representative of Oricom.

Oricom will not be liable under this Express Warranty, and to the extent permitted by law will not be liable for any defect, loss, damage or injury arising out of or in connection with a:

1. Failure by you to adhere to the warnings and follow the instructions set out in this user guide for the proper installation and use of the product;
2. Willful misconduct or deliberate misuse by you of the product;
3. Any external cause beyond our control, including but not limited to power failure, lightning or over voltage; or
4. Modification to the product or services carried out on the product by anyone other than Oricom or Oricom's authorised service provider.

How to make a claim under your Express Warranty in Australia

Oricom has a simple warranty process for you to follow:
- Please call or email our Customer Support Team, 02 4574 8888 or support@oricom.com.au.
- A Customer Support Team member will verify after troubleshooting with you if your product qualifies under warranty. If so, they will give you a Product Return Authorisation number.

- We will then email a Return Authorisation form and a Repair Notice (if necessary), together with instructions on how to return the product for warranty service.

Please note that if a Customer Support Team member advises that your product does not qualify for return, this warranty does not apply to your product. Products that are authorised to be returned to Oricom in Australia must include all of the following:

- A completed Return Authorisation form
- A copy of your Proof of Purchase (please keep your original copy)
- The faulty product, including all accessories.

Send the approved returns to:

Oricom International Pty Ltd

Locked Bag 658

South Windsor NSW 2756 Australia

Please note that this Express Warranty excludes expenses incurred by you in returning any faulty product to us. You must arrange and pay any expenses incurred (including postage, delivery, freight, transportation or insurance of the product) to return the faulty product to us, however, we will arrange delivery of the repaired or replaced faulty product to you.

Important Information
Repair Notice

Please be aware that the repair of your products may result in the loss of any user-generated data (such as stored telephone numbers, text messages and contact information). Please ensure that you have made a copy of any data saved on your product before sending for repair. Please also be aware that products presented for repair may be replaced by refurbished products or parts of the same type rather than being repaired.
