

## FOODLUBE® MULTI-PASTE

### *Food Grade, Multipurpose, Anti-Seize and Lubricating Paste*

#### Description:

**ROCOL® FOODLUBE® Multi-Paste** is a superior performance, white, food grade, non-toxic anti-seize and assembly paste developed for protecting fasteners and lubricating bushes, slides and small open gears operating in food/clean environments. It is also suitable for use as a food grade drilling, tapping and cutting lubricant, particularly when maintenance has to be carried out in the process area.

**FOODLUBE® Multi-Paste** is designed to operate across a wide temperature range and is particularly suitable for stainless steel fasteners used in high temperature applications.

**FOODLUBE® Multi-Paste** is economical in use – only requires a thin film for maximum performance.

#### Intended Use:

- Ideal for stainless steel fasteners, particularly at elevated temperatures.
- Threads.
- Bushes.
- Slides Small open gears.

#### Product Features:

- **Excellent wide temperature resistance of -30°C to +450°C.**
- **Extremely low sulphur and chlorine levels.**
- **Extremely tenacious – Highly resistant to water wash off.**
- **Does not contain: mineral hydrocarbons, animal derived materials.**
- **NSF Registered.**
- **HACCP Australia Pty Ltd endorsed**
- **Manufactured from only FDA listed ingredients.**
- **MPI Approved C15 (All animal product except dairy).**
- **MPI Approved for farm dairies & dairy processing.**

#### Typical Physical Properties:

Appearance	Smooth white paste
Base Type	Synthetic lubricant
Solids	White, non-toxic solids
Temperature Range	-30°C to + 450°C
Water Solubility	Insoluble

#### Application Instructions:

Ensure that both surfaces are clean and dry prior to application. Apply as a thin film by brushing or wiping onto a clean dry surface.

#### Warranty:

Rocol® will replace any material found to be defective. Because the storage, handling and application of this material is beyond our control, we can accept no liability for the results obtained.
